DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Saturday, 09 September 2023 at 05:42 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Very warm or hot conditions continue across much of the UK with light winds. Widespread Moderate air pollution is expected across the southern UK, with isolated areas of High, especially for eastern areas. Low pollution is expected further north.

Tomorrow: Areas of Moderate air pollution become restricted to predominantly eastern England, with a chance of localised High levels of air pollution, as showers or thunderstorms become more widespread across the UK. Remaining areas of the UK are expected to have Low levels of air pollution.

Outlook: Unsettled weather conditions at first, followed by fresher and cooler conditions, will bring Low levels of air pollution to the UK through the period.
